Rutile - Cai bom Mine, Brazil 4.5 x 3 cm

Barcelona 06/06/2016

Well, after our re-start in Ste. Marie past year, I have to say that the experience was so satisfactory that we will be there again. In the same place as last year, so at the front the "Piscine" space, very visible and just in the main avenue that connects the Theater with the different "avenues". You cannot miss us! ;-)

A lot of fresh material this year but not strictly new because most of these specimens come from several different collections we bought after the Tucson Show. So many classics and many old timers, as well as our regular proposals of "what's new" from elsewhere, with an special offer of Iranian minerals.

See you soon during [Ste. Marie](#), the most pleasant mineral show in the world!

Jordi Fabre
